Background on the CPSTF: The CPSTF is an independent, nonfederal panel whose members are appointed by the CDC Director. CPSTF members represent a broad range of research, practice, and policy expertise in prevention, wellness, health promotion, and public health. The CPSTF was convened in 1996 by the Department of Health and Human

Services (HHS) to identify community preventive programs, services, and policies that increase healthy longevity, save lives and dollars, and improve Americans' quality of life. CDC is mandated to provide ongoing administrative, research, and technical support for the operations of the CPSTF. During its meetings, the CPSTF considers the findings of systematic reviews on existing research and practice-based evidence and issues recommendations. CPSTF recommendations are not mandates for compliance or spending. Instead, they provide information about evidence-based options that decision makers and stakeholders can consider when they are determining what best meets the specific needs, preferences, available resources, and constraints of their jurisdictions and constituents. The CPSTF's recommendations, along with the systematic reviews of the evidence on which they are based, are compiled in the *The Community Guide*.

Matters proposed for discussion: Cardiovascular Disease Prevention (Pharmacy-Based Interventions to Increase Medication Adherence); Mental Health (School-Based Cognitive Behavioral Therapy Programs for the Prevention of Depression and Anxiety Disorders); Cancer Prevention and Control (Community Health Worker Interventions to Improve

Screening Rates for Breast, Colorectal, and Cervical Cancer); Health Equity (Supportive Housing Policies to Address Homelessness); Physical Activity (Effectiveness of eHealth Interventions for Increasing Physical Activity Among Older Adults and an Economic Review of Interventions to Increase Active Travel to School). The agenda is subject to change without notice.
